

# Art Therapy: A Brain Based Profession

Juliet L. King, MA, ATR-BC, LPC

- Master of Art Therapy degree from Hahnemann University
- Director of the inaugural Graduate Art Therapy program at Herron School of Art and Design
- Adjunct assistant professor in the Department of Neurology at the IU School of Medicine

**Abstract:** The fields of art therapy and neuroscience are inextricably linked, much like the processes of consciousness and unconsciousness, the mind and body, and the limbic system and cerebral cortex. Applying art therapy theory, treatment, and research within a neuroscience framework is crucial to understanding and helping the clients we work with. Further, understanding art therapy in the context of neuroscience will substantiate support within the healthcare and insurance communities for the practice of the profession, as well as invigorate legislative and licensure efforts nationwide.

Friday April 8, 2016 Workshop 6 CEUs

Arrive at 9:00 am for check in, coffee, tea, and socialization

9:30-3:30 pm

Nazareth College -York Wellness and Rehabilitation Institute Atrium

Nazareth College and WNYATA sponsored event

**PRE-RESERVATIONS REQUIRED-SPACE IS LIMITED**

Name & Credentials \_\_\_\_\_
